LAYAA

Layaa AI Private Limited

“From Manual Workflows to Intelligent Systems”

https://www.layaa.ai/

LAYAA

The Problem

- Only **~15%** of Indian SMEs have adopted AI effectively
- **59%** of MSMEs lack access to AI tools & expertise
- Most AI solutions are too complex or enterprise-focused
- No structured onboarding → AI tools remain unused

Impact

- Businesses lose **20–30%** productivity due to manual workflows
- Missed opportunity: $500B+ AI-driven value for Indian MSMEs
- Delayed decision-making due to lack of automation
- High operational costs due to inefficient processes

Why Now ?

- AI market growing at 30%+ CAGR globally
- 75%+ SMBs already experimenting with AI
- No-code tools (n8n, GPT, Relevance AI) are making AI accessible
- Early adopters gaining competitive advantage rapidly

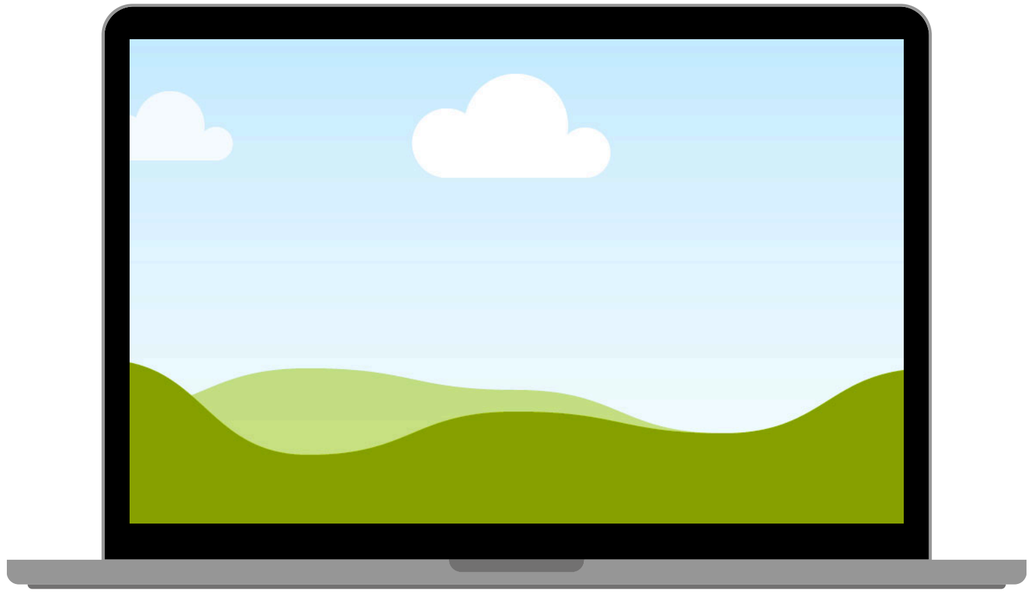
Introducing Layaa AI !

Who We Are

- An **AI automation** and **enablement company** focused on making **Artificial Intelligence** accessible and practical for **SMEs**
- We bridge the gap between complex AI technologies and real business use cases



What We Do

- Design and implement AI-powered workflows to automate business operations
- Build scalable, no-code/low-code automation systems using advanced AI tools
- Enable teams through AI onboarding, training, and continuous support
- Deliver end-to-end AI adoption — from strategy to execution

Our Mission

To enable businesses with AI education, consulting, and automation that improves efficiency and decision-making

Our Solutions

"From learning AI to scaling it - we enable complete AI adoption."

End-to-end AI enablement for SMEs - from strategy to execution

Design and deploy AI-powered workflows to automate business operations

Enable teams through structured AI onboarding, training, and documentation

Build scalable no-code / low-code automation systems integrated with existing tools

Provide continuous support and optimization for long-term performance

Market Potential

TAM

$ 276 M

Source: ET

SOM

$ 14 M

India Agentic AI & Automation Market

Market Size:

- Valued at **~$276 Million** (2024)
- Projected to reach **~$3.5 Billion** by 2030
- Driven by rising demand for workflow automation, AI adoption, and operational efficiency

Next 5 Years Target

Target Market Capture: **~5%** of India's Agentic AI Market

5% of $276 Million = $13.8 Million

Achievable through targeted SME adoption and scalable AI solutions.

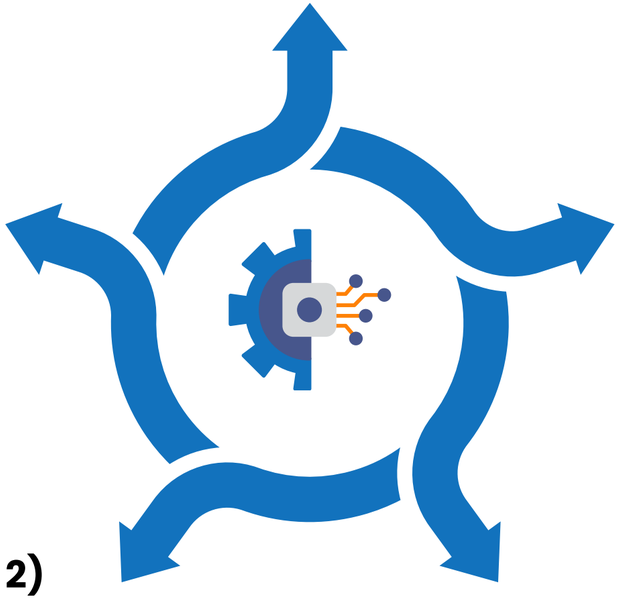
Go To Market Strategy

Consulting-Led Entry

Acquire clients through AI consulting → convert into long-term automation + subscription

Niche Industry Focus (Phase 1)

Start with high-automation-need sectors: agencies, e-commerce, service businesses



Content & Education Funnel

Leverage LinkedIn, workshops, webinars to educate SMEs on AI adoption

Product-Led Expansion (Phase 2)

Launch SaaS tools, pre-built automations, and AI marketplace

Partnerships & Ecosystem

Collaborate with agencies, SaaS tools, and business networks for client acquisition

Expansion Plan

Geographical Expansion

Scale from Tier 1 cities to Tier 2 & 3 SME clusters

Industry Expansion

Expand across sectors like e-commerce, services, manufacturing, and logistics

Product Expansion

Launch SaaS platform, pre-built automations, and AI marketplace

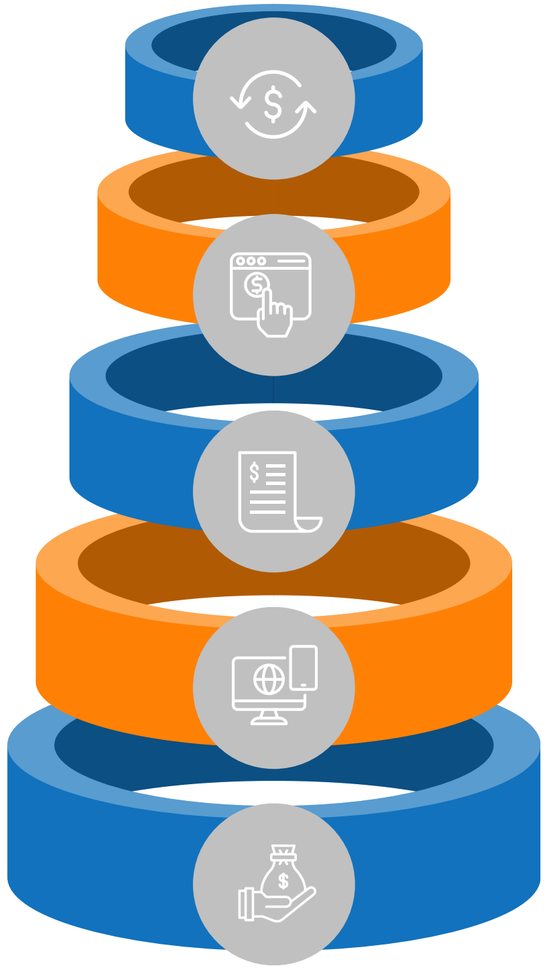
Technology Enhancement

Develop advanced agentic AI and scalable automation systems

Partnership Expansion

Build ecosystem with agencies, SaaS platforms, and enterprise partners

Revenue Model



Implementation Fees

One-time charges for AI setup and workflow deployment

Subscription Model

Recurring revenue for maintenance, optimization, and support

Pay-Per-Use

Usage-based pricing for automation services

Consulting & Training

Fees for AI consulting, audits, and workforce training

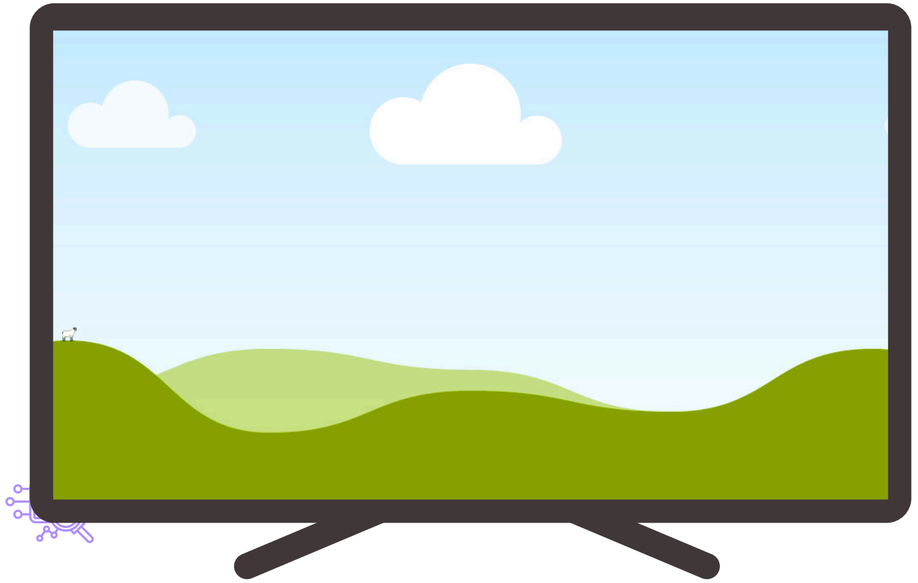
Future (SaaS & Marketplace)

Subscription-based AI tools and white-label solutions

Competitive Landscape

Platform	Offering	Limitation	Layaa AI Advantage
Zapier / Make / Power Automate	Workflow automation tools	Limited AI capability, requires manual setup	AI-driven, business-ready automation with full implementation
n8n (Open-source)	Custom workflow automation	Technical complexity, not beginner-friendly	No-code, simplified automation for non-technical teams
Relevance AI / Flowise / Lindy	AI agent & automation tools	Tool-centric, lacks consulting & execution support	End-to-end solution: consulting + development + training
Yellow.ai / Chatbot Platforms	Customer support automation	Limited to chatbots, not full business workflows	Full-stack automation across operations, sales, and support
SAP / Traditional ERP Systems	Enterprise business management	Expensive, complex, not SME-friendly	Affordable, scalable, and customizable for SMEs

What Makes Us different !



End-to-End AI Enablement

From strategy to deployment and continuous support

Built for SMEs (Affordable & Scalable)

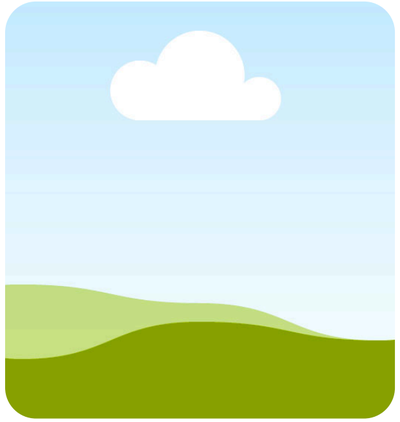
Simple, cost-effective solutions designed for real business use

Practical, No-Code AI Adoption

Enables non-technical teams to use and scale AI

“We turn AI from a complex concept into a practical business tool.”

Our Team



ABHIMANYU SINGH - DESIGNATION
